

Core Performance & Operational Visuals

- **Total Sales Amount & Sales Target (Cards)**
 - **Purpose:** Displays the two most critical executive metrics instantly.
 - **Why it works:** Gives stakeholders an immediate, distraction-free snapshot of overall business health within two seconds of opening the report.
 - **Minimum Target by Segment (Multi-Row Card)**
 - **Purpose:** Groups and lists the lowest baseline goals established across individual business sectors.
 - **Why it works:** Keeps track of the "floor" targets without cluttering the screen with multiple standalone cards.
 - **Sales Target Achievement by Category (Clustered Column Chart)**
 - **Purpose:** Compares side-by-side actual revenue numbers against budgeted goals for each product category.
 - **Why it works:** Instantly exposes which product lines are hitting their milestones and which are falling short.
 - **Monthly Sales Trend (Line Chart)**
 - **Purpose:** Plots the historical trajectory of total revenue chronologically over months.
 - **Why it works:** Helps you spot seasonal demand cycles, peak sales months, and long-term growth trends at a glance.
 - **Geographic Sales Analysis (Map)**
 - **Purpose:** Plots total sales volumes geographically using bubble size markers over specific cities.
 - **Why it works:** Uncovers spatial patterns and regional hot-spots where market penetration is strongest.
 - **Sales Performance Matrix (Matrix Table)**
 - **Purpose:** Cross-tabulates raw sales metrics and targets across two intersecting dimensions (Categories down the rows, Months across the columns).
 - **Why it works:** Offers a highly structured, drillable view for users who prefer precise numerical audits over graphics.
-

Tab 2: Product & Order Deep-Dives

- **Comparison of Profit and Quantity (Scatter Chart)**
 - **Purpose:** Explores relationships and correlations between two numeric variables (volume sold vs. profitability) across sub-categories.
 - **Why it works:** Instantly flags operational outliers, such as high-volume products dragging down profit margins, or low-volume niche items yielding massive returns. [1]
- **Max Profit Margin by Sub-Category (Donut Chart)**
 - **Purpose:** Shows the maximum profit efficiency achieved by your top product sub-sectors.
 - **Why it works:** Focuses attention on product ceiling potential while giving a clean, circular visual break from traditional rectangular grids.
- **Sales Distribution by Sub-Category (Treemap)**
 - **Purpose:** Displays nested, proportional rectangles to show how much weight each sub-category contributes to total sales.
 - **Why it works:** Easily conveys product portfolio composition, making it obvious which sub-categories dominate your inventory space. [1]
- **Order Count Analysis by State (Funnel Chart)**
 - **Purpose:** Tracks transaction volume descending from your highest-order state down to your lowest.
 - **Why it works:** Effectively showcases regional tier rankings and the progressive drop-off in transaction volumes across territories.
